

BIPUL KUMAR

Product Manager | Embedded Systems | IoT | Automotive | AI/ML | Strategy

Mob: +91 – 9071373192 / 7250616831 | E-mail: vipulsingh52919@gmail.com / bipulkumar.90@gmail.com | [LinkedIn](#)

PROFILE SUMMARY

Product leader with 11+ years of experience driving innovation and scaling solutions across Embedded Systems, IoT, Automotive, and AI/ML domains. Proven track record of launching successful digital products, leading **cross-functional global teams (20+)**, and delivering **\$10M+ in revenue**. Expertise in full **product lifecycle** — from concept to commercialization — including embedded firmware, hardware-software integration, and connected platform strategy. Passionate about blending cutting-edge tech with business impact. Open to strategic leadership and consulting opportunities.

SKILLS

Product & Leadership

Product Strategy & Roadmaps | Go-To-Market (GTM) Planning | Cross-functional Leadership | Business Analysis & Value Proposition | Agile and Scrum Methodologies | PLM (Aha!, Jira, Azure DevOps) | Cost Optimization & Vendor Negotiation

Technology Expertise

Embedded Systems (8051, AVR, ARM, Cortex, RISC-V, Multi Core) | Firmware Development (Bare Metal, RTOS, Linux) | Connectivity (BLE, Wi-Fi, MQTT, Cellular, GNSS) | IoT Architecture (Gateways, Edge Devices, Protocols) | Hardware-Software Integration | Automotive Protocols (CAN, SENT)

AI/ML and Data

Programming Languages (Python, C, SQL) | Data Analytics & Visualization (Tableau, Power BI) | ML, Deep Learning, GANs, Image Processing | EDA, NLP, Time Series Forecasting | MATLAB Simulink | UML | State Machines

WORK EXPERIENCE

Product Manager – Automotive & IoT | Innovation Lead

Jio Platforms Limited, Bengaluru | Mar 2023 – Present

Automotive | Embedded | IoT | AI/ML

- Spearheaded the development and launch of **2-wheeler EV cluster** (Android, Linux, RTOS) and **Jio Connectivity Modules**, enhancing market penetration and product performance.
- Directed cross-functional teams across hardware, software, and product domains to deliver **TPMS, BLE Tags** increasing OEM adoption and feature differentiation.
- Optimized inventory utilization and reduced costs by 40% through embedded **architecture redesign** and **BLE gateway** enhancement.
- Championed stakeholder alignment with OEMs and vendors, improving delivery timelines and negotiation outcomes.
- Introduced agile development practices that reduced product cycles and improved release predictability.

Lead Engineer

Quest Global, Bangalore | Aug'22 – March'23

Automotive, Embedded & IoT

- Engineered and **integrated BLE and Wi-Fi** connectivity into a legacy vehicle tracking device, significantly improving feature set and real-time tracking capability.
- Enabled wider market reach and increased product adoption by enhancing device functionality and positioning the product as a competitive telematics solution.
- Collaborated with cross-functional stakeholders to align engineering improvements with market needs, resulting in improved customer satisfaction and accelerated go-to-market timelines.
- Contributed to business growth by unlocking new revenue opportunities through feature enhancement, boosting client retention and market share.

Senior Field Application Engineer

Arrow Electronics, Bangalore | May'21 - Aug'22

Embedded & IoT

- Drove customer engagement from design to production, resulting in quarterly purchase orders averaging **\$3–3.5M** and accelerating revenue growth.
- Led technical consultations, design-in wins (D-Ins), and design wins (D-Wins) by aligning silicon solutions with customer requirements across **Automotive and Embedded domains**.
- Facilitated **cross-functional collaboration between customers and silicon vendors** to resolve design challenges and accelerate time-to-market.
- Organized targeted **workshops** and **product launch events** in partnership with major silicon suppliers, enabling strategic customer acquisition and solution evangelism.
- Provided hands-on support for embedded **hardware and firmware integration**, influencing component selection and design architecture.

Technical assistant

Edom Technology, Bangalore | Aug'17 – Mar'21

Embedded & IoT

- Accelerated D-Ins and D-Wins through end-to-end execution of high-impact POCs featuring advanced SoCs for smart home and industrial products — including **Door Sensors, Smart Plugs, Touch Speed Regulators, Smart Switches, BLE Gateways**.
- Partnered closely with sales teams and clients to drive **technical pre-sales, demos, and solution architecture**, leading to significant increase in design adoption and revenue pipeline.
- Enhanced inventory planning and **demand forecasting accuracy through data-driven techniques**, reducing stock-out rates and improving delivery cycles.
- Built and nurtured key partnerships with OEMs and component vendors, strengthening the company's ecosystem positioning and **go-to-market agility**.
- Led internal workshops and knowledge-sharing sessions to upskill sales and engineering teams on next-gen **Embedded & IoT SoC** platforms.

Founder

AAISHA Engineering, Delhi | Dec'13 – Mar'17

Embedded Systems | Automotive Electronics | Entrepreneurship

- Founded and scaled a hardware-focused embedded systems **startup**, delivering innovative custom solutions for OEs defined use cases.
- Secured and closed multiple high-value client deals, sustaining profitable operations over 3 years and building a reputation for technical excellence.
- Designed and led development of key products including:
Automatic Starter for Diesel Generators | GPS-RF-Based Offline Tracking System | Insulation Box for temperature-sensitive equipment | Self-Starter Cutoff System for Vehicles
- Managed full product lifecycle — from requirement gathering and hardware-software co-design to customer onboarding and support.
- Aligned all product launches with client needs and evolving industry standards, establishing strong B2B relationships and repeat business.

EDUCATION

- **MS in Data Science, Liverpool John Moores University, 2024**
- **B. Tech in ECE, Punjab Technical University, 2011**

CERTIFICATION

- **Aha! Product Management Professional Certificate** – LinkedIn Learning
- **Customer Development** – PMI & IIBA®
- **Building a Product Roadmap** – Project Management Institute
- **Building a Product Strategy** - Project Management Institute
- **Technical Product Management** - PMI & IIBA®
- **Executive PG in Data Science** -IIIT-Bangalore

PATENT APPLIED

- Performance Optimization of the **FCEV Control unit** using **RNN**.

DATA SCIENCE PROJECTS

- Lead Scoring Case study
- Telecom Churn Prediction
- Melanoma Detection
- Gesture Control
- Style Transfer Using GAN
